Professional Summary

Software Developer skilled in modern web technologies. Experienced in building scalable applications from concept to deployment with a strong focus on clean code. Practical experience from academic, internship, and industry projects.

Work Experience

Front-End Developer
LeadDesk Oy
November 2025 – Present

- Enhanced user interface quality and improved overall front-end issues.
- Debugging bugs and UI issues using Typescript and Angular.
  Key Technologies: TypeScript, Angular

Front-End Developer
Lan4AI Oy
February 2025 – October 2025

- Improved UX and optimized performance for AI-based products.
- Diagnosed and resolved front-end issues using TypeScript and React.js.
  Key Technologies: TypeScript, React.js

Thesis Worker
LAB University of Applied Sciences, Finland
November 2024 – April 2025

- Developed a MERN stack Personal Study Plan web application for Department of Mechanical Engineering in LAB University of Applied Sciences.
- **Key Technologies:** MongoDB, Express.js, React, Node.js

Summer Intern
LAB University of Applied Sciences, Lappeenranta, Finland
May 2024 – August 2024

- Built React.js markdown documentation tool with automated testing workflows and CI/CD pipelines.
  Key Technologies: React.js, JavaScript, CI/CD, Docker, Node.js, npm test

LUMA Assistant
LUT University, Lappeenranta, Finland
February 2023 – January 2024

- Delivered technology workshops and developed educational materials for K–12 students.
- Improved workshop content based on faculty feedback.

Education

Bachelor of Industrial Information Technology
LAB University of Applied Sciences, Lappeenranta, Finland
2022 – 2025 | GPA: 4.29/5.0

Technical Skills

- **Languages & Frameworks:** Python, JavaScript, TypeScript, C, C#, .NET, React, Angular Node.js, Express.js
- **Web Development:** HTML5, CSS, REST APIs
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools & DevOps:** Git, Docker, Azure, GitLab, CI / CD, Jira
- **Testing:** Selenium, npm test
- **Concepts:** OOP (Object-Oriented Programming)

Projects

Personal Study Plan (PSP) Web Application
Developed a MERN Stack application to digitize curriculum management for mechanical engineering at LAB University of Applied Sciences.
Technologies: MongoDB, Express.js, React, Node.js, JWT, Material UI, Redux

Smart Car Parking System Digital Twin
Designed 3D models and animations for a parking lift system with vehicle spawning.

Technologies: C#, Unity3D, 3D Modelling

IoT Gym Occupancy Monitoring System
Implemented IoT pipeline connecting PIR motion sensors to a real-time web dashboard.

Technologies: Node.js, MQTT, InfluxDB, Docker, Azure, Python, React.js

---

Certifications & Languages

- **Supervised Machine Learning** | DeepLearning.AI – September 2024
- **Introduction to Generative AI** | Google Cloud Training – September 2024
- **Cybersecurity for Everyone** | University of Maryland – October 2023

Languages:

- **English:** Fluent
- **Nepali:** Native
- **Finnish:** Currently learning
